WORK EXPERIENCE

Imam Abdulrahman bin Faisal University
Deanship of E-Learning and Distance Learning   Feb 2017 — July 2019

Web Full stack developer/ Blackboard Administrator

- I worked on developing an examination system to handle most of the examination processes and services (around thirty services) related to students, examiners, administrators and grader.
- I worked on an automation system to manage the courses design development processes for Quality Matters (QM) accreditation.
- I worked on developing a ticketing system that provides many services for the E-Learning students eliminating the need to physically visiting the university.
- I worked on Room Reservation system for deanship halls and rooms.
- I worked on creating a deanship warehouse system to manage and keep track of deanship possessions.
- I worked on administrating the E-Learning systems including installation, configuration, troubleshooting.
- I worked on managing data integration and course delivery solution.
- I worked on managing users accounts and activities.
- I worked on generating statistical report on demand (using Blackboard analytics).
- I worked on managing integrating third party applications (buildings block) with blackboard.

Haka Group Internship   Jun 2015 — Aug 2015

I Developed an automation system for the company's HR. The system helps in managing, organizing, and keeping track on the HAKA employees that work in other companies.
